About Me

A final-year Informatics student with a strong interest in software development and web programming. Proficient in programming fundamentals using HTML, CSS, JavaScript, Go, and PHP, as well as frameworks like Laravel. Possesses strong problem-solving, teamwork, and communication skills. Skilled in AI prompting techniques to leverage generative AI tools for efficient software development, debugging, and documentation. Eager to grow and contribute to an IT team by developing effective and innovative software solutions.

Experience

Freelance Software Developer **January 2024 – Current**

- Teman Pergi (Car Rental Web Application) – Served as a Fullstack Developer, building a responsive web application using React.js and Go. Designed and developed REST APIs, integrated MySQL database, implemented secure payment processing with Midtrans, and utilized Docker for containerized development and deployment.
- Mulqi Group (Web Application PT Mulqi Sejahtera Bersama) – Contributed to the development of an ERP web application for property business operations using Laravel and Bootstrap 5. Developed and maintained key features including real-time chat, PDF generation, CRUD functionality, and supporting modules to streamline property management and operational processes.
- Simkes (Web Application) – Served as a Backend Developer (Laravel and Bootstrap 5) in integrated MySQL database. Built secure REST APIs, implemented data validation, and developed backend logic.

Education

Univercity of Pamulang

Bachelor's Degree in Informatics Engineering **2023 – Present**

Skill

a. **HTML,**
b. **CSS,**
c. **JavaScript (React, Next.js),**
d. **GO (Golang), Gin, Fiber,**
e. **PHP (Laravel).**

a. **MY SQL, PostgreSQL,**
b. **Git,**
c. **Docker,**
d. **Postman,**
e. **Bootstrap 5,**
f. **Tailwind CSS.**

a. ***Problem solving skills,***
b. ***Teamwork,***
c. ***Communication skills,***
d. ***Tech adaptability***
