About Me

Fullstack Developer with 2+ years of professional experience architecting and shipping production-grade systems across diverse industries. Currently holds concurrent fullstack roles building customer-facing platforms and internal tooling end-to-end - from React.js, Next.js frontends to Go, PHP (Laravel) backends, containerized with Docker. Specialized in RESTful API design, JWT/RBAC authentication with multi-tenant isolation, media/logging infrastructure, and admin panel development. Experienced with Odoo ERP (v15) customization across FAAT, SCM, and Manufacturing modules, and third-party integrations including Midtrans Payment Gateway.

Experience

Freelance Software Developer **January 2024 – Current**

- Teman Pergi (Car Rental Web Application) – Served as a Fullstack Developer, building a responsive web application using React.js and Go (Gin). Designed and developed REST APIs, integrated MySQL database, implemented secure payment processing with Midtrans, and utilized Docker for containerized development and deployment.
- Dokterhub (ERP System for Clinics, PT Gerin Mitra Husada Jakarta) – Contributed as a Fullstack Developer using Laravel and Bootstrap 5. Implemented key features including real-time chat, PDF generation, CRUD operations, and other supporting modules for clinic operations.
- Hemoku & M-Diabetic Care (Health Screening Apps) – Served as a Backend Developer (Laravel) in collaboration with lecturers from Stikes Widya Dharma Husada. Built secure REST APIs, implemented data validation, and developed backend logic.

Education

Univercity of Pamulang

Bachelor's Degree in Informatics Engineering **2023 – Present**
